

Examples of biochemistry projects that assess mastery of course:

Project Option	Links
1. Enzyme kinetics – simulated experiment to determine Km, Vmax with and without inhibitor and identify inhibitor	
2. Protein purification for one protein	
3. Play FoldIt – Educational version complete 29/29 education puzzles and submit reflection and screenshot	
4. Variation and 3-D visualization of protein changes in genetic metabolic disorder	<p>View the assignment</p> 
5. CYPs and SNPs – create new scenario and answers.	<p>Video Introduction</p>
6. Make mozzarella (and ricotta) cheese and reflection on molecular processes
